

First we need to make a supporting rule that gets us the **Campaign Code** assigned to the **Action** that **MX0** is evaluating the **Eligibility** for:

As we are aggregating, we first need to select which aggregation **function** we are using. We will be using **Sum of the elements in** to get the value of **Diminished Neutral Click Count** for each matching **Action**:

Next, we open the **DIP**, select the field we want:

You will notice that as we have used this **function**, when we enter the **DIP** we are limited to only fields that return a **number** and that we are not required to apply any filters.

Next, we apply our filter:

Choose a data item as a list
