

In this example, we will get the **Diminished Activity Count** where the **Proposition** is the Proposition we have assigned to the **Action** that **MXO** is evaluating the **Eligibility** for, and the **Activity Type** is "AT 1".

As there is no aggrigation needed, we first open the **DIP**, select the field we want:

Choose a data item

Diminished count

Propositions / Activities / Diminished count

Retrieve the Diminished count for Propositions where

Proposition name = Current proposition

Retrieve the Diminished count for Activities where

Activity Type name = AT 1

Cancel

Next

Finally, we save our rule:

Proposition - Diminished Activity Count - Current Proposition + AT 1

Enter a brief description of your Eligibility Rule

Diminished count of Current Proposition + AT 1
