

In this example we will get the **View Count** for all **Actions** whose name includes "Usecase - Popup".

As we are aggregating, we first need to select which aggregation **function** we are using. We will be using **Sum of the elements in** to get the value of **View Count** for each matching **Action**:

Action - View Count - Includes 'Usecase - Popup'

Enter a brief description of your Eligibility Rule

sum of the elements in ...

Next, we open the **DIP**, select the field we want:

Choose a data item as a list

View count

Actions / View count

You have selected the whole Actions collection.

If you want to be more specific, add selection criteria

Cancel

Done

You will notice that as we have used this **function**, when we enter the **DIP** we are limited to only fields that return a **number** and that we are not required to apply any filters.

Next, we apply our filter:

1 / 2

Choose a data item as a list
