

In this example we will get the **Negative Click Count** where the **Action** is the **Current Action** that **MXO** is evaluating the **Eligibility** for.

As there is no aggregation needed, we first open the **DIP**, select the field we want:

Choose a data item

ProfilesData ItemsFunctions

Search

Data Adapters

actions

Action name

Datetime of last negative click

Datetime of last neutral click

Datetime of last positive click

Datetime of last view

Diminished negative click count

Diminished neutral click count

Diminished positive click count

Diminished view count

Negative click count

Neutral click count

Positive click count

View count

customerMetaData

Negative click count

Actions / Negative click count

Retrieve the **Negative click count** for **Actions** where

Action name

=

Please select
